

Reference Letter

Paris, December 21st 2018,

Hippolyte Jacque joined the Web Studio as a trainee in May 2017. I was, at that time, director of the Web Studio of the team in Paris. Our activity is the creation of websites for hotels. 2 categories of products are proposed to the hotels : templated website of our catalog (fixed design and structure), or full custom, both developed on Wordpress.

We were looking for a person who could help us with the development of our full customized website, as well as someone who could find technical solutions to reduce the time spent by the project manager to enter data into our standard template website.

Hippolyte has met our expectations. He worked closely with Paris project managers and our web studio in Italy. He analyzed our website templates and shared knowledge with Web Studio developers. He developed a module which automates data entry on the website. It has structured the database provided by our hotels and project managers are also gaining time in production.

Hippolyte completed the work by creating the documentation of the module in English.

In parallel, he has also developed some front end and back end parts of our full website such as <https://www.karibea.com/>.

Hippolyte also speaks English fluently. He is a reliable person, he gets involved in the teamwork and objectives. It was a pleasure to work with him.

Should you need more information, do not hesitate to contact me.
